Danyang Jiang

PhD Student in Astrophysics

Kavli Institute for Astronomy and Astrophysics & School of Physics, Peking University

jiangdy@stu.pku.edu.cn | (+86) 157 6267 6930

ORCID: 0009-0003-6747-2221 | Homepage: https://dyjiang.github.io/

Education

Peking University, Beijing, China — Sep 2024 - Jul 2029 (expected)

Ph.D. in Astrophysics, Kavli Institute for Astronomy and Astrophysics (KIAA)

Advisor: Prof. Linhua Jiang

Peking University, Beijing, China — Sep 2020 - Jul 2024

B.S. in Astronomy; Advisor: Prof. Linhua Jiang

Undergraduate thesis: Cosmic Evolution of the Fe II/Mg II Line Ratio in Quasar Broad-Line Regions

Research Highlights

Research interests:

- High-redshift Quasar, AGN and LRD
- Early black hole growth and galaxy-AGN coevolution
- Large-scale environment of AGNs
- The Epoch of Reionization
- JWST emission-line spectroscopy and wide-field surveys

Publications (as of October 15, 2026)

- A total of **14** papers in major astronomical journals (ApJ, Nature Astronomy, etc.), including **6** first-authored papers (2 in preparation).
- A total of **68** citations based on the SAO/NASA ADS.

Research Skills

Observations	JWST/NIRCam imaging and WFSS; JWST/NIRSpec and VLT/XSHOOTER spectroscopy; HST, Subaru/HSC, SDSS, and DESI data analysis
Methods	Spectral analysis and emission-line measurements; AGN-host decomposition; Environment and clustering analyses; SED fitting; injection-recovery completeness simulations; Slitless spectroscopic data reduction and forward modeling; maximum-likelihood estimation and Bayesian inference (MCMC)

Teaching

- Teaching Assistant, Foundations of Theoretical Physics I, Peking University, 2025
- Teaching Assistant, Atomic Physics, Peking University, 2026

Honors and Scholarships

- CAST Young Science and Technology Talent Program – PhD Special Program, China Association for Science and Technology, 2025-2027
- President Scholarship, Peking University, 2024 & 2025 & 2026

Selected Conferences

- **Academic Annual Conference of Chinese Astronomical Society** 2026
  Shijiazhuang, China
  Talk: *Large-scale Environmental Dependence of AGN Activity Revealed by JWST Paα Emitters*
- **EREBUS / COSMOS-3D Meeting** 2026
  Ann Arbor, MI, USA
  Talk: *Paschen-line AGNs: MBH, luminosity functions, and large-scale environments*
- **The 28th Guo Shoujing Symposium on Frontiers in Galaxy Cosmology** 2026
  Haikou, China
  Talk: *Black Hole Mass Estimators and Luminosity Functions of Paschen-line AGNs*
- **EREBUS / COSMOS-3D Meeting** 2025
  Bologna, Italy
  Talk: *Ruling out AGNs as the dominant source of cosmic reionization with JWST*
- **The 27th Guo Shoujing Symposium on Frontiers in Galaxy Cosmology** 2025
  Changsha, China
  Talk: *Ruling out AGNs as the dominant source of cosmic reionization with JWST*
- **European Astronomical Society Annual Meeting** 2025
  Cork, Ireland (online)
  Poster: *No Redshift Evolution in the Fe II/Mg II Flux Ratios of Quasars across Cosmic Time*

Publications and Manuscripts

First-authored papers
